

# Prescription for Relocation: Compliance-First IT Migration for a Fortune 500 Healthcare Leader

## CASE STUDY

### THE CHALLENGE

In healthcare IT, HIPAA compliance shapes every operational decision. Security is a requirement, and that standard doesn't pause for a relocation. When a Fortune 500 healthcare company needed to move 25 devices across Italy — including Cisco routers, switches, and servers alongside Dell PowerEdge servers — finding the right partner meant finding one that took security as seriously as they did.

The devices being moved carried the responsibility of patient data and regulatory accountability at every step of the journey. A standard relocation vendor wouldn't cut it. The company needed a partner that could document, verify, and guarantee the security of the move from the moment a device was powered down to the moment it was back online.

### OUR SOLUTION

Park Place stood out from the start. Where other vendors offered general assurances, Park Place brought a structured approach to security: site audits, formal risk assessments, and a green-light-to-green-light guarantee that gave the customer full visibility and confidence at every stage of the move.

The Park Place team provided a complete, full-assist relocation, handling deinstallation, cabling, transport, and full re-racking at the new site. When scheduling challenges emerged mid-project, the team adapted without sacrificing the security protocols or the quality of the work. The entire move was completed in four days.

### THE RESULTS

Every device and every piece of data remained HIPAA-compliant throughout the entire process without exceptions. The customer's systems came through the relocation exactly as they needed to, secure and fully operational.

The results spoke for themselves. As of March 2026, Park Place is already working with the same customer on a new relocation, a straightforward sign that when compliance and execution are both done right, the partnership continues.

## PARK PLACE TECHNOLOGIES

Park Place Technologies, founded in 1991, is a global IT infrastructure service firm. We help 25,500 organizations — including half the Fortune 500 — fuel innovation by dramatically reducing time and money spent on IT infrastructure management, while boosting performance and Uptime.

Powered by the world's largest on-the-ground engineering team, a robust group of advanced engineers, and our global Enterprise Operations Centers, Park Place delivers significant cost savings on hardware maintenance, software technical support, hardware procurement, and more.

We also streamline IT infrastructure management, freeing internal teams from day-to-day tasks, enabling them to focus on strategic initiatives.

**Park Place Technologies:**  
**Save. Simplify. Innovate.**
